

Working at EIS

Introducing EIS

EIS is a multi-disciplined automation engineering and electrical company based in New Zealand. We specialise in providing innovative solutions to industrial sector businesses to enable them to improve efficiency and safety in their operations.

With offices located in Invercargill, Christchurch and Timaru, and clients spanning a wide range of industries and locations throughout New Zealand, a career with EIS offers a diverse range of challenges.

We are currently in a phase of rapid expansion to meet the needs of our growing client base, and are seeking highly competent, motivated people to fill new roles being created within the company. This represents an outstanding opportunity for the right candidates to join our unique and rewarding working environment.

Current positions available

We are seeking experienced industrial electricians and automation engineers for the following roles:

Canterbury Manager	Operations Manager
Electrical Manager	Industrial Electrician
Electrical Team Leader	Automation Engineer
Senior Automation Engineer	HSEQ Manager
Electrical Estimator	MES (GE) Technical Sales

Does this sound like you?

The most important qualities we are seeking are:

- ✓ Excellent interpersonal and written communication skills
- ✓ Commitment to excellence in your work
- ✓ Self-motivation and the drive to work hard
- ✓ A team player who enjoys working collaboratively
- ✓ The ability to think innovatively
- ✓ Good practical problem solving ability
- ✓ A strong desire to learn and apply new skills

What's on offer

Working at EIS you will experience:

- ✓ A tight-knit and progressive company culture
- ✓ Effective management support
- ✓ Excellent opportunities for training and development

Living in Southland or Canterbury you will enjoy:

- ✓ Excellent lifestyle opportunities afforded by low cost of living combined with above average remuneration
- ✓ A scenic location with nearby mountains, lakes, rivers and forests ideally suited to outdoor recreational pursuits such as skiing, biking, hiking, boating and fishing.
- ✓ Safe and welcoming communities, well-resourced for individual and family life

Where we work

EIS provides electrical and automation services to an ever growing range of industries. Our clients are located throughout New Zealand, which means the opportunity to travel for work on project sites from time to time.

Key industries we service include:

- ✓ Dairy processing
- ✓ Food processing
- ✓ Water and wastewater systems
- ✓ Machine control
- ✓ Manufacturing
- ✓ Refrigeration
- ✓ Timber

A few words from our team

“

Our primary focus is and always has been our people. They are our number one asset.

DEAN ADDIE CEO

“

We have recently grown our engineering team from 5 to 16 engineers, and are actively recruiting to further expand. Our team members bring a vast range of credentials and experience working around the world. I am genuinely proud of the entire team, knowing they can provide the best services to our clients.

BRENT WEBSTER Engineering Manager

“

The range of projects we work on is amazing, we are never short of a challenge and that is how I work best. My family and I love it here in Invercargill. The pace of life is relaxing and the people are very friendly. We like to explore the natural beauty of New Zealand and travel to places such as Milford Sound and Coronet Peak, as my children love to play in the snow.

MUHAMMAD ZEESHAN
Senior Project Engineer

Relocated from Pakistan to join EIS in 2015

“

Working at EIS has been a great opportunity for me professionally and also for my family. We are very glad to have the chance to provide our children with the opportunities that come with the highly regarded schooling system here.

SYLVAIN FARCY
Senior Control Systems Engineer
Relocated from France to join EIS in 2015
